2.

This building was built in 1835 by Ethan Allings for use as a General Store. A few years later (date unknown) the Post Office moved into the store and remained until 1935.

The building now houses the local Public Library in rear, and small store in front. There are apartments upstairs.

Construction is of concrete block made at a concrete block plant nearby. It is believed to be the first building in Ohio of this type of construction.
